

# Colour Management Policy

BKT ensure that its colour management complies with ISO 12647-2 2004; Amendment 1, 2007. Production Method - Litho Only, Compliance Method - Scoring System. A standard which applies a set of Printing Specifications prepared by the Technical Committee ISO/TC 130 Graphic Technology. Processes in scope are Pre-Press, Proofing and Press.

BKT ensure maintenance and compliance with the standard by ensuring :

- All ink conforms to standard requirements
- All monitors/proofing devices are calibrated and checked on a regular basis
- All paper types are accurately categorised
- Curve readings from press are monitored, recorded and reviewed on a regular basis
- All necessary infrastructure and equipment necessary for the production of compliant products is provided
- All infrastructure and equipment is reviewed in the light of technological and other changes
- The competence of all personnel within the scope of the Colour Quality System is maintained and developed through ongoing training

This Colour Quality policy is made available to interested parties via the BKT website, via the internal document share site, and issued on request.
